

## Community Council Organisations

### Scottish Borders Community Council Network (SBCCN)

SBCCN is a group established to facilitate the sharing of best practice, and allow greater communications across all Community Councils in the Scottish Borders. It provides a stronger collective voice for Community Councils across the area allowing them to consult with other agencies. SBCCN organises an annual conference, which allows Community Councillors from across the area to come together and meet with representatives of key local service providers and ask questions on topical issues. An executive group, which has representation from each of the 5 Area Committee areas, meets quarterly to discuss issues and develop Borders-wide ideas.
